# 2. GENERAL BROWSER

Simple, powerful and intelligent.

Our browser allows you to search all countries and filter contents, offering multiple selection of items.

The general browser offers different search options:

## • With all words

This type of search is the default search of our program. It allows you to locate documents containing all of the terms in your search. To delimit the search a little more you just have to add more terms.

Note: Please note that the browser omits usual words such as "where", "how" or "the", as well as some digits and special characters.

## •With exact sentence

This type of search only shows results matching exactly the specified terms. This type of search is ideal if you are interested in specific sentences and complex expressions, as well as if you need a immediate definite result.

## •With logical operators AND/OR/NOT

This type of search allows you to add or exclude terms or to look for synonyms in your search.

#### •With one of the words

This type of search allows you to get results containing one of the specified terms, that is, it excludes the exact sentence finding multiple derivations.

## •Proximity

This type of search allows you to find similarities with the criteria or terms specified in the search bar.

#### •Reference number

This type of search is useful when trying to locate specific documents. Through a classification system implemented by Editorial Tirant, using reference numbers, you can locate the exact document, for example: LTM2.101.014.

# **SERVICES AREA**

LATAM has taken the time to create an exclusive services area offering additional functions for its users with access to a true virtual library and other databases and useful tools.

#### I. Virtual library and Tirant journals

The virtual library offers search tools for publications by Tirant since the year 2005. Thanks to collaboration agreements, it also offers publications from other publishers.

You can search by title, content, author, collection and subjects. You can also creat an account to customize your readings.

Another perk of the virtual library is the fact that it is growing from the day you sign up, making online reading as convenient as reading on paper, allowing you to read already designed (same as printed version) books in full. The platform also allows you to use reading tools designed to copy, print, making notes, highlighting, underlining, crossing words out, writing freehand, drawing figures like circles, rectangles and lines, reading in two-page format or increasing font size.

# II. Access to other database: Tirant Human Rights

Salir		Índice Voces	Sentencias de la CortelDH	Legislación Medidas
Buscar en	a toda la base de datos			
	Que contenga la expresión		buscar

All the jurisprudence of the Inter-American Court of Human Rights analyzed paragraph by paragraph and linked to the Mexican jurisprudence and Constitution, with international instruments and with the Tirant lo Blanch doctrine.

#### **III.** Customization

Your private area inside the database: allows you to create a user profile with the selection of a country of your choice and to save: documents, indexes, searches and your alerts.

## IV. New arrivals

Weekly newsletter on current legal issues that users can subscribe to. They can adjust their preferences by country and type of document.

#### V. Currency converter

World currency conversion according to the IMF and the ECB.

#### VI. Tirant TV

Channel about current legal issues.

# 5. RESULTS

Results are sorted by country and type of document

By selecting a country, a special system of filters is activated, allowing you to delimit your search. Each country and document has a filter system of their own. You must activate the country in order to access the filters.

By activating the country, we also have the possibility to search by date range.

You can sort the results by relevance or by ascending or descending date. We can

print the results and save them in the customization area, as well as downloading each document to your personal computer.

# 6. DOCUMENTS

LATAM documents are interactive, they are connected to each other through a link system and through special functions such as related documentation, a quoting system and classification. All these functions are located on the left margin, allowing you to zoom in and out depending on the use.

Documents are accessed by directly clicking their title or by their reference TOL number or through any browser.

At the top of the page there is a toolbar for all types of documents:

At the left margin we can see: display of the document in reading mode, print, save in my documents (in the customization area), send by e-mail download in Word or PDF and increase or decrease font size.

At the right margin we can see: the document's reference number or TOL number and the possibility of maximizing or minimizing the screen.

LATAM gives us the possibility of searching within the documents by coloring the searched expression and moving from one expression to another.
